

## Position Description

**Title:** Web Developer  
**Reports to:** Indego General Manager  
**Other Accountability:** Director of Technology  
**Location:** Philadelphia, PA warehouse headquarters (Kensington neighborhood)

## Summary

Bicycle Transit Systems (Bike Transit) is a national leader in urban bike share implementation & operations. With the most experienced team in the industry, Bike Transit brings a data-driven approach to the planning, implementation, and operation of bike share programs. We pride ourselves on creating close partnerships with our municipal clients and delivering highly successful programs to the cities we serve.

In partnership with the City of Philadelphia, Bike Transit launched Indego, Philadelphia's Bike Share system in April 2015 with 70 stations and 700 bikes. System expansion is anticipated in 2016. We are a rapidly growing small company whose mission is to make bike share convenient, affordable and fun!

Bike Transit is seeking a Web Developer to lead the ongoing development and maintenance of the Indego website. This position includes both front end and back end development in a PHP/Wordpress environment. Under the guidance of the Indego General Manager, the Web Developer will work with Bike Transit staff and the City of Philadelphia to outline the scope and implement several projects, which include both front-end and back-end enhancements.

This is a key role in the growth of Indego, and will support many different aspects of our business, including marketing, operations, our cash payment program and customer service. Strong verbal and written communication, a desire to act as a service and resource to a committed team, and the ability to see a project through from start to finish, and deliver a strong result on time are all necessities of this position.

We also anticipate that this position may grow as additional projects are identified and as the system expands.

## Qualifications:

### Required Skills and Experience

- 4 years experience as a web developer.
- 1 year experience as a lead web developer.
- PHP/MySQL/Javascript/HTML5/CSS.
